

REMARKS/ARGUMENTS

This amendment is filed under 37 C.F.R. §1.312, which permits entry of amendments after allowance and before payment of the issue fee, upon recommendation of the primary examiner.¹

The present amendment corrects informalities discovered during a post-allowance review of the present application; and the present amendment was diligently filed after that discovery.

Claims 21-120 were indicated as allowable in the present application. Claims 26 and 33 are amended to correct a recently discovered error. More particularly, those claims are amended to replace the “before-development toner-compression member” with the “application member”. Applicant’s Figure 18 illustrates a non-limiting example of the features recited by the Claims 26 and 33. More particularly, Applicant’s Figure 18 illustrates an anilox roller 1712, a developer roller 1709, and a before-development set roller 1710 reading on the added application member, the developer support, and the deleted before-development toner-compression member, respectively. As noted by Applicant’s specification, in this example, the anilox roller 1712 and the developed roller 1709 are maintained to have substantially the same potential.²

Accordingly, Applicant respectfully submits that adequate support is provided for the above-noted amendment; and submit that correction of Claims 26 and 33 is justified.

¹ See MPEP 714.16.

² Applicant’s specification, page 72, line 23 – page 73, line 14.

Based on the above remarks, it is respectfully submitted that the present amendment merely corrects a formal matter in Claims 26 and 33, is needed for proper protection of the invention, and requires no substantial amount of additional work on the part of the Office.³ Entry of this amendment is thus respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
